

Configurations of Digital Participatory Budgeting

Pablo Aragón

e-Governance Conference 2024
Tartu & Internet || May, 22-23

Research challenge

Technology is playing an increasingly important role in participatory budgeting.

Technology design is inherently political and always embeds value: there are no such things as value-free and neutral digital platforms

Technology configuration is a form of software tailoring, aligning a piece of off-the-shelf software with workplace practices.

RQ1: What configurations exist in digital participatory budgeting?

As democracy is diverse, platform designs operate on different normative foundations.

RQ2: What types of civic participation do digital participatory budgeting configurations exhibit?

Data and methods

Decidim, the free open-source digital platform for participatory democracy

- Wide adaptation (hundreds of instances around the world on a single platform)
- Configurability (instance admins define processes by choosing components)
- Participatory budgeting as a feature

<https://decidim.org>

31 cases with participatory budgeting processes between 2016 and 2020, whose data were available through the API (24 in Spain, 6 in France, 1 in Finland).

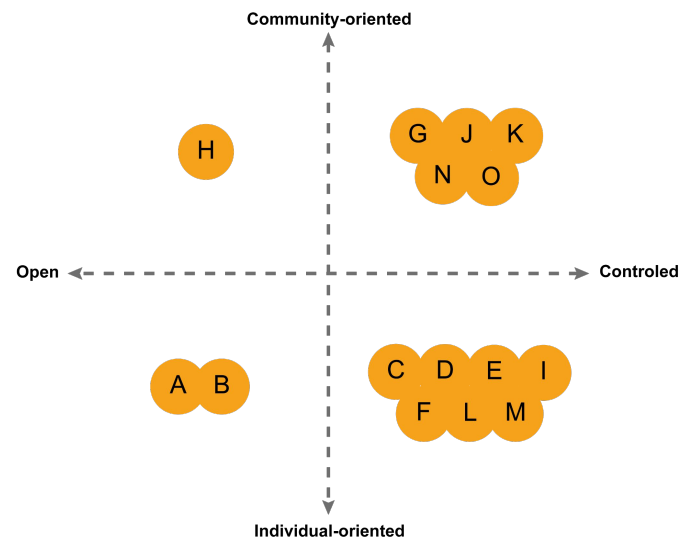

Inductive exploratory methods (observe, recognise patterns, construct explanation) for:

1. understanding participatory budgeting configurations
2. understanding the function of steps
3. understanding how configurations and steps impact the democracy of the process

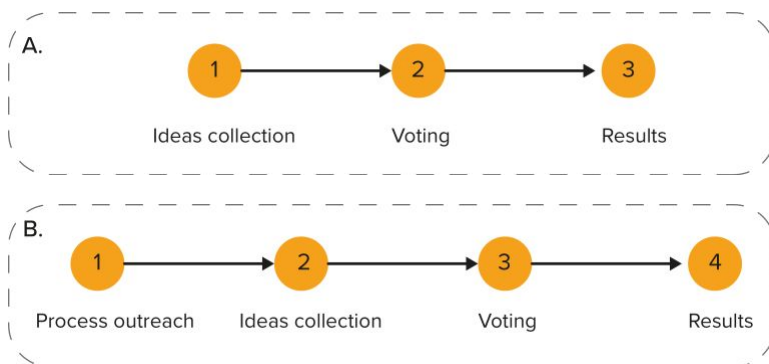

Socio-technical configurations of participation

Steps distributed across two democratic axis

Individual-oriented and Open

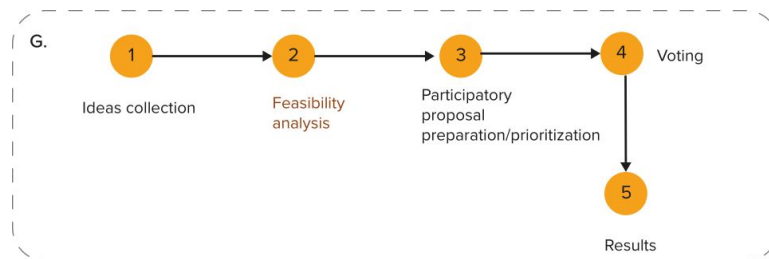

Community-oriented and Open

Individual-oriented and Controlled

Community-oriented and Controlled

Summary of findings

RQ1: What configurations exist in digital participatory budgeting?

- Many!
 - 25 different technical configurations in 31 participatory budgeting cases
 - 15 different configurations of participation, i.e., socio-technical setups showing how citizens are expected and allowed to take part in participatory budgeting.

RQ2: What types of civic participation do digital participatory budgeting configurations exhibit?

- Configurations can present diverse forms of participation
 - Community-oriented vs individual-oriented // open vs controlled
- These dimensions also touch on key aspects of how democracy functions.
